PROFESSIONAL SUMMARY:

SENIOR GAME DEVELOPER | PRODUCT DEVELOPMENT | RAPID PROTOTYPING

Game Developer and Product Development professional with 10+ years of experience in game development, backend systems, rapid prototyping, and technical leadership. Experienced in taking ideas from concept and technical validation through prototyping, implementation, and delivery across AAA, mobile, WebGL, multiplayer, iGaming, and localized game projects. Combines hands-on engineering expertise with cross-functional team leadership to turn concepts into playable products.

EXPERIENCE:

Market Research Specialist | Game Development [December 2024 - September 2026]

DigiPlus Interactive Corp - BGC

- Expanded responsibilities beyond market research into **game development, product development, rapid prototyping, and technical leadership**.
- Developed **4 Unity WebGL games,** 3 physics-based games (**Basketball, Billiards, and Coin Toss**) and 1 lottery game (**Raffle**).
- Led **game and product ideation and rapid prototyping**, turning concepts into playable prototypes to evaluate game mechanics, player experience, physics, networking, and technical feasibility.
- Developed multiplayer and networked game prototypes using **WebSockets, HTTP, and Protobuf**, including server-driven gameplay and networking feasibility experiments.
- Led multiple projects as a **Team Lead**, coordinating 5–6 member cross-functional teams across development, art, server, and product.
- Pioneered the company's **casual iGaming game development approach**, introducing game-driven betting experiences such as physics-based basketball, billiards, and coin-toss games.

Senior Game Developer [January 2020 - September 2024]

Tose Philippines - BGC

- Led a team of 6 developers in porting **Square Enix's Dragon Quest Treasures** from Switch to Steam using Unreal Engine 4, achieving a **Mostly Positive** Steam rating.
- Led teams of 3–4 developers in developing **web-based games for international clients** in Japan and Vietnam using Phaser.
- Contributed as a **UI Developer** to a AAA turn-based JRPG using Unreal Engine 5, collaborating with TOSE Japan's developers, artists, and planners.
- Developed multiple **hyper-casual games and prototypes**, working closely with programming, art, server, and other departments throughout development.

Part-Time Faculty **[September 18, 2018 - April 2020]**

De La Salle College of Saint Benilde - Manila

- Taught programming and game development subjects including AI, Game Physics, Game Engines, Unreal Engine fundamentals, and basic programming.

Game Creator **[January 18, 2017 - December 19, 2019]**

Most Played Games - Makati

- Designed, developed, and shipped **10+ mobile game titles** for Android and iOS using Unity.
- Managed the **end-to-end game development process**, from game design and UI/UX to programming and deployment, while providing direction to game artists.
- Developed an in-house **cross-promotion platform** to support marketing and user acquisition across the company's game portfolio.

Game Developer → Backend Developer **[April 21, 2014 - January 17, 2017]**

Tose Philippines - BGC

- Started as a **Game Developer**, handling game localization, updates, and development.
- Transitioned into **Backend Development**, building game-related online services, internal utility websites using PHP/Bootstrap, and a push notification system using Java Sockets.

SKILLS

Game Development: Gameplay Programming, Rapid Prototyping, UI/UX, Simulated Physics
Game Engines: Unity, Unreal Engine, Phaser
Programming: C#, C++, JavaScript, PHP
Backend & Networking: WebSockets, HTTP, Protobuf
Platforms: WebGL, Android, iOS, Steam
Tools: Git, SVN, Photoshop

EDUCATION & ACHIEVEMENT:

De La Salle–College of Saint Benilde — Manila
Bachelor of Science in Information Technology
Specialization in Game Design and Development
PRG Scholar · PLDT Smart Foundation Scholar · Consistent Dean's Lister
